WRITTEN OPINION OF THE

Box No. I Basis of this opinion

1. With regard to the language, this opinion has been established on the basis of the international application in the language in which it was filed, unless otherwise indicated under this item.

☐ This opinion has been established on the basis of a translation from the original language into the following language _____, which is the language of a translation furnished for the purposes of international search (under Rules 12.3 and 23.1(b)).

2. With regard to any nucleotide and/or amino acid sequence disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of:

a. type of material

☐ a sequence listing

☐ table(s) related to the sequence listing

b. format of material

☐ in written format

☐ in computer readable form

c. time of filing/furnishing

☐ contained in international application as filed.

☐ filed together with the international application in computer readable form.

INTERNATIONAL SEARCHING AUTHORITY**

International application No.
PCT/IB04/00911

Box No. V Reasoned statement under Rule 43 bis.1(a)(i) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Claims <u>1-33 and 36-42</u>	YES
	Claims <u>34-35</u>	NO
Inventive step (IS)	Claims <u>1-33 and 36-42</u>	YES
	Claims <u>34-35</u>	NO
Industrial applicability (IA)	Claims <u>1-42</u>	YES
	Claims <u>NONE</u>	NO

2. Citations and explanations:

Claims 34-35 lack novelty under PCT Article 33(2) as being anticipated by Frigg, WO 01/54601 A1. Figs. 2-4 of Frigg show a bone plate having all the limitations as recited in claims 34-36, including: a bone-contacting bottom side 2; a top side 1; a plurality of sets of overlapping holes 14/24 having threads 5 adapted to receive a bone screw 11 with a threaded head 12 and a bone engaging threaded shank.

Claims 1-33 and 36-42 meet the criteria set out in PCT Article 33(2)-(3), because the prior art does not teach or fairly suggest a bone plate having all the limitations as recited in claims 1-33 and 36-42. For example, with respect to claim 1, the prior art does not teach or suggest a bone plate having at least one set of overlapping holes, wherein the at least one set of overlapping holes defines a threaded aperture having multifaceted surfaces.

Claims 1-42 meet the criteria set out in PCT Article 33(4), and thus have industrial applicability because the subject matter claimed can be made or used in industry.
